POWER MOTION

PM09

INJECTION PUMP

The Power Motion PM09 is a compact, lightweight, and versatile injection pump designed for concrete repair in construction and residential applications. Engineered for easy handling and convenient on-site operation, it delivers efficient and reliable performance for PU injection, polyurethane grouting, and crack repair, making it an ideal solution for building maintenance, waterproofing and structural restoration.

COMPACT • HIGH-PRESSURE • MOBILE

BUILT FOR STRUCTURAL REPAIR

High-pressure Injection

Compact on-site control

CORE SPECIFICATIONS

700 bar **OUTPUT PRESSURE**	**520 bar** **RESTART PRESSURE**	**2 mm** **MAX. GRAIN SIZE**	**900 W / 1.2 HP** **OUTPUT**	**220 V / 50 HZ** **VOLTAGE**	**7 kg** **WEIGHT**

DESIGNED AROUND THE WORKSITE

01 **COMPACT & LIGHTWEIGHT**
Easy to handle and position for demanding on-site repair work.

02 **MULTI-PURPOSE OPERATION**
Supports PU injection, PU grouting and crack repair applications.

03 **HIGH-PRESSURE DELIVERY**
Produces up to 700 bar output pressure for effective injection.

04 **COMPLETE ON-SITE SETUP**
Includes the hose, injection tool and essential service accessories.

MADE FOR BUILDING MAINTENANCE

CONCRETE STRUCTURES • EXPANSION JOINTS • TUNNEL LEAKS

Suitable for structural joints, building works and restoration projects
